INSTRUCTIONS FOR HOW TO CREATE A QR CODE

UNDERSTANDING QR CODES

In their simplest form, QR codes are simple a graphic which is scanable by a QR reader / app. When scanned it will redirect to a direct link of your choice.

ADDING YOUR OWN QR CODE TO A DESIGN

As all QR codes are different, it's important you create your own QR code. If you are using Canva you can use the built in QR code generator (instructions included on page 2).
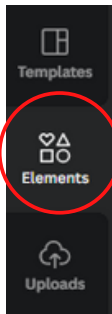

Alternatively we recommend QR Monkey or there are lots of free options when you google the term 'QR Generator'.

STEPS TO ADD YOUR OWN CODE

01. Generate your own QR code and download as a jpg or png file.

02. Upload your QR code to the design software used in the template.

03. Insert your QR code into the design and adjust the size & location.

04. Test your QR code to make sure it directs to your link of choice.
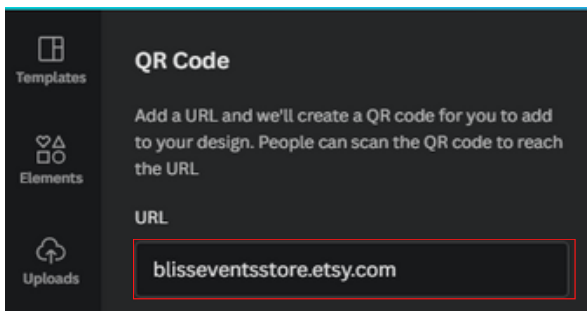

# INSTRUCTIONS FOR HOW TO CREATE A QR CODE

01.

Go to elements in Canva

02.

Then type in QR Code

03.

Click on 'use app'

04. Type in the URL you want to refer people to

05.

Then generate QR code

06.

Then replace the QR code that is displayed on the invitation with the one you have just created. (Simply drag a corner in until it is the desired size)
